ASOMS

Automating the process of enforcing state and
federal laws mandating sex offender registration,
address verification, and monitoring

- Provides investigators immediate and accurate information about all registered offenders home, employment and associates addresses within a requested distance from a crime scene

- Comprehensive searches on biographical descriptions, vehicle, type of crime, arrest history or any of the other fields of data in the database.

- Automates compliance to federal and state requirements for Megan's Law

- Configurable to match any agencies workflow for notification verification, and processing of sex offender registration

- Automatic address validation

- Records facial images, images and descriptions of scars, marks & tattoos and biometric fingerprints for identification

- Tracks historical registration Information, including arrest, booking, and conviction history

- Tracks victim Information and history

- Provides detailed information on status of registration and notification

- Automatic notification of a configurable list of contacts for non-compliance of registration

Geographical Information System Interface

SRN #	NAME
00022956	Aguilar, Reynaldo
00808259	Alexander, Willie
007774511	Baucom, Raymond

- Automates notification to enforcement and others needing the information using e-mail, automatic dial telephone, instant messaging or form letters

- Automatic notification to enforcement is configurable by the agency, specific to agency work flow process

- All data fields are searchable for investigative purposes, including lineups, suspect identification, related crime locations and methods

- All data, including mugshot images, fingerprints, biographical and historical data can be accessed using mobile notebooks
