

## idSoftware's Identification Management System Video Imaging

### The solution: Inmate Property

Inmate property is a standalone module of idSoftware's Identification Management System

Designed specifically for booking and corrections officers, law enforcement investigators, and intelligence analysts

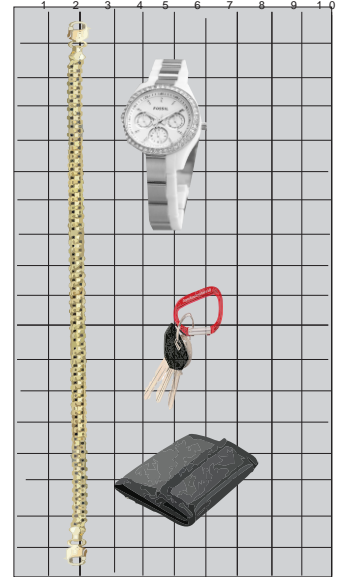

Inmate property intake system which takes a picture of the inmate property and attach the image to an inmate record. This process substantially reduces the amount of time it takes to manually record property descriptions, eliminates the need to enumerate each item of property, saving valuable time with each booking and ensuring accuracy of descriptions and value.

- The system is programmed with all the necessary and mandatory forms and reports to immediately begin processing inmate property.

Pre-programmed forms include:

- INTAKE RECEIPTS
- PROPERTY RETURN RECEIPTS
- PROPERTY RETURN AUTHORIZATION

- An unlimited number of custom forms can be created by agency staff and associated with an inmate's property.

This solution provides a detailed record and eliminates the possibility of an inmate suggesting that he or she did not receive the same property back upon release.

The system records the inmate signature on the record and requires the inmate signature for release. Includes a barcode

Inmate Property as part of an agencies records management system will save cities and counties countless dollars and resources by preventing frivolous litigation and increasing the efficiency of intake and release.

The Property Intake Record is where the image and the information about the property is stored in the system. This record is attached to the inmate record and can be viewed or added to at any time.

- ✓ Image and Record Cash as Property - When receiving money the system records the amount and updates the inmate accounting system
- ✓ Inmate Property makes it easy to receive property or money from authorized third parties and attaches an image to the inmate record
- ✓ When integrated with PrintSearch the program can require fingerprint identification to be associated with property intake and release – providing positive identification of the parties involved
